Household Energy Price Index for Europe

September Prices Just Released

**Who is paying the most? Who is paying the least?
and where are prices heading in Europe?**

KEY FINDINGS AS OF SEPTEMBER 2010

European energy prices kept rising in September for both electricity and gas. Electricity prices increased for the fourth consecutive month and gas prices for the sixth. Electricity prices are their highest level since we started this survey in January 2009 while gas prices have not been as high since April 2009. This trend started already in the second half of 2009 and is very visible on the European Energy Price Developments graphs. Increasing prices might reflect a general sentiment that the worst of the economic crisis is behind us and that economies are picking up again as well as higher oil prices over the period and seasonal demand increases; especially in summer or winter months. The index for power currently stands at 103.8 index points (up from 102.8 last month) and the index for gas stands at 89.55 (up from 89.34 in August).

The table "Total Price Rankings" shows that prices remained unchanged in most cities. Changes in London, Copenhagen

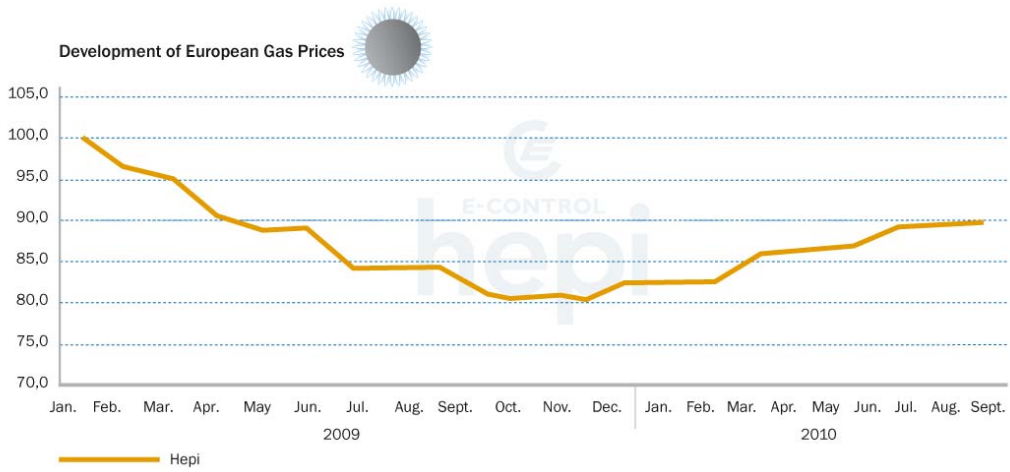

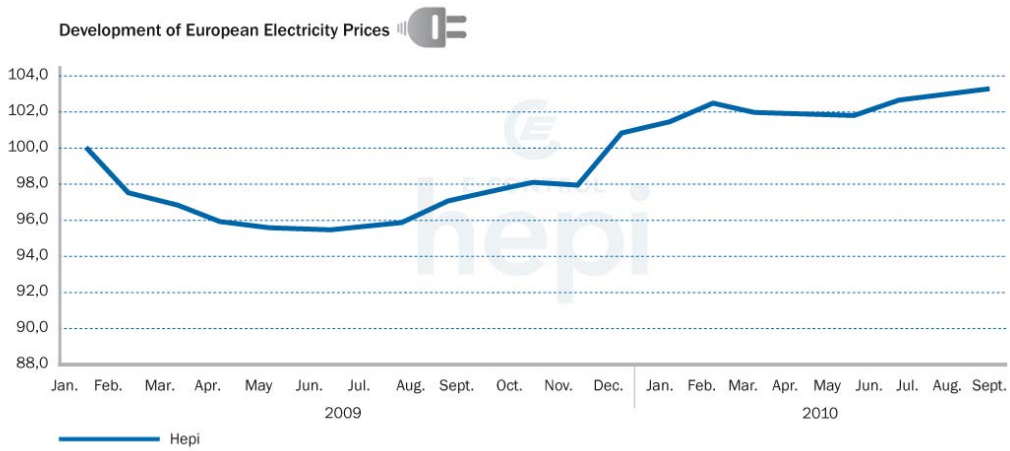

In This Month's Edition

- HEPI price trend - European energy prices continue rising*
- Total price ranking – Few price changes in European capital cities*
- Energy Price breakdown – National fiscal policy as influential as market forces*

and Stockholm (for gas) are due to exchange rate fluctuations while changes in Dublin and Luxembourg are due to daily rates. Household customers in Copenhagen pay by far the highest electricity prices within the capital cities of the EU-15 while customers in Athens and Helsinki pay the least (all tax included). Inhabitants of Athens pay, in fact, about 2.5 times less than inhabitants of Copenhagen. Natural gas household customers in Stockholm pay by far the highest prices within the capital cities of the EU-15. Prices in Stockholm are about 60% higher than in the second most expensive city Copenhagen, and about 4.5 times more than in the British capital city where Londoners enjoy by far the lowest prices. It is interesting to note that for both electricity and gas, cities in the top and bottom three of the tables have only rarely changed since the price collection started, with changes taking place among the cities in the middle of the tables.

The price breakdown of local electricity tariffs shows major variations in the share of each component. Our survey shows that on average energy represents about 49% of the total electricity bill, distribution 28%, energy taxes 10% and VAT 13% whereas energy represents 52% of the total gas bill, distribution 26% energy taxes 9% and VAT 13%. Copenhagen is a very unusual case; the energy component of the electricity bill represents less than a fourth of a Danish household's electricity bill, by far the lowest of all cities, whereas the energy taxes represent an astonishing 33% (over three times the EU-15 average) and 53% if we include VAT. Overall, the results show that market forces represent only half of the energy (both for electricity and gas) bills whereas national fiscal and regulatory elements are responsible for the other half through distribution tariffs as well as energy taxes and VAT.

EUROPEAN ENERGY PRICE DEVELOPMENT (EXCLUDING TAXES)

TOTAL PRICE RANKINGS (INCLUDING ENERGY, DISTRIBUTION AND TAXES)

Ranking	Electricity (all tax included)			Gas (all tax included)			
	City	Price in € cent / kWh	Change / previous month	City	Price in € cent / kWh	Change / previous month	
Most Expensive	1	Copenhagen	28,93	⇒	Stockholm	18,37	↑
	2	Berlin	22,78	⇒	Copenhagen	11,28	↑
	3	Brussels	21,45	↑	Rome	7,68	⇒
	4	Vienna	19,47	⇒	Vienna	6,55	⇒
	5	Luxembourg City	18,34	↓	Brussels	6,40	↑
	6	Dublin	18,21	↓	Berlin	6,38	⇒
	7	Amsterdam	17,30	⇒	Amsterdam	6,16	⇒
	8	Stockholm	17,05	↑	Paris	6,10	⇒
	9	Lisbon	16,98	⇒	Madrid	6,03	⇒
	10	Madrid	16,90	⇒	Luxembourg City	5,82	↓
	11	Rome	15,76	⇒	Athens	5,63	↓
	12	London	14,64	↑	Lisbon	5,60	⇒
	13	Paris	13,19	⇒	Dublin	5,21	⇒
	14	Helsinki	12,88	⇒	London	4,29	↑
Cheapest	15	Athens	11,64	⇒

What is the HEPI?

Based on the electricity and natural gas prices collected both for incumbents and competitor companies in capital cities of EU15 member states, E-Control GmbH in cooperation with VaasaETT has compiled The Household Energy Price Index, HEPI. The HEPI is a weighted end user price index that assesses overall price developments in Europe.

The HEPI is Europe's only independent comparative monthly index of electricity and gas prices across the 'EU 15' states. Data is collected directly from utilities and authorities in the respective markets, using a thorough, precise and comparative definition and methodology.

The HEPI project also compiles and publishes a monthly ranking and analysis of capital city prices within the EU15.

E-Control GmbH and VaasaETT will continue to publish HEPI every month until at least 2011.

About the Authors

E-Control

E-Control GmbH was set up by the legislator on the basis of the new Energy Liberalisation Act and took up work on 1 March 2001. E-Control is headed by Mr Walter Boltz as the managing director and is entrusted with monitoring, supporting and, where necessary, regulating the implementation of the liberalization of the Austrian electricity and natural gas markets.

VaasaETT Global Energy Think Tank

The VaasaETT Global Energy Think-Tank is a leading independent think-tank for the global utilities industry. A unique collaborative concept based on the philosophy of value-for-all through its network of thousands of senior executives, officials, researchers and other experts who are for the most part known and trusted personally.

The Think-Tank focuses broadly on practical strategic business and market issues including Marketing, Psychology, Behaviour and Market Requirements relating to Successful Competition, Customer Switching & Loyalty, Smart Grid, Demand Response, Smart Home and Energy Efficiency, as well as envisioning state of the art innovations and developments.

Our service fall into three main categories: Community, Collaborative Projects and Consultancy & Research.
