

Agreement on Fees for the use of the AIB Hub for international transfers of Guarantees of Origin in accordance with Section 10 of the Standard Terms and Conditions (STCs)

Year 2026

The Association of Issuing Bodies (AIB) provides a technical interface (the AIB Hub) for the cross-border trading of guarantees of origin. E-Control is designated as the issuing body for all types of electricity and gas guarantees of origin, including hydrogen, and, as such, is a member of the system in the interest of Austrian market participants.

All fees charged to E-Control for the use of the AIB system are passed on to those market participants who use the AIB-HUB for the cross-border transfer of guarantees of origin.

AIB fee billing is based on categories that relate to the traded volumes of guarantees of origin (imports and exports, electricity and gas) in the previous calendar year per country.

Min. Transfer Volume (TWh)	Category	Fee
0	Small	7 000 Euro
4	Medium	45 000 Euro
10	Large	80 000 Euro
100	Extra Large	95 000 Euro

Austria is classified as large member in 2026. The annual fee is 80 000 Euro.

The fees are allocated among all market participants who have signed the STCs and thus use the AIB interface, in proportion to the transactions they have executed. Billing takes place annually. The invoice sent to market participants must be paid within 30 days. E-Control reserves the right to pass on to market participants any changes made by AIB to the financing system in the manner described above.
